

Greenhouse Gas Emissions

AllianceBernstein (AB) has been measuring its carbon emissions internally since 2010. At the firm level, we also pledged to achieve net zero Scopes 1 and 2 emissions in our operations by 2050.

AB considers the principles and guidance of the World Resources Institute and World Business Council for Sustainable Development's *The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard* (Revised Edition), *GHG Protocol Scope 2 Guidance: An amendment to the GHG Protocol Corporate Standard*, and *Corporate Value Chain (Scope 3) Accounting and Reporting Standard: Supplement to the GHG Protocol Corporate Accounting and Reporting Standard* to guide the criteria to collect, calculate and report its sustainability metrics. The emissions reporting period is from January 1, 2023 to December 31, 2023, which is aligned to AB's fiscal year (FY). In 2023, AB received limited assurance on its FY 2022 Scope 2 (location-based) and FY 2023 Scopes 1, 2 (location-based) and 3 (Category 6) GHG emissions data. Data from previous years have been adjusted as more accurate data became available.

Data are as of December 31, 2023.

1 Fuel refers to the on-site combustion of natural gas at leased offices and data centers.

2 Electricity refers to the purchase of electricity at leased offices and data centers.

3 Travel refers to commercial air and rail business travel undertaken by AB employees.

4 Prior TCFD reports stated building occupancy. This figure has been replaced with full-time employee headcount to align with AB's annual 10-K report
